Eden Prairie, Minnesota – December 1, 2025 – Changes in the Minnesota treatment landscape require us to update our service offerings to remain sustainable and mission-driven – and to support expanded access to treatment for more populations.

Beginning January 1, we will shift to a comprehensive outpatient model, including PHP, IOP, Virtual IOP, and expanded co-occurring mental health services for adults 18 and older.

Moving forward, the new Foundations Minnesota will serve as the umbrella for the Pride Program, allowing us to reach more individuals while continuing the affirming, evidence-based care that has defined Pride since 1986. The program is a vital part of who we are—and it will continue at our Minneapolis outpatient location.

With locations in Eden Prairie and Minneapolis, this new approach will strengthen our ability to serve more individuals, while preserving our LGBTQ+-specific programming and helping to ensure Pride continues to thrive.
